Top 5 Burj Khalifa Facts

Large, tall and sensational, maybe these are the most memorable things and the most recognizable **Burj Khalifa facts**. Since the beginning, this mega construction was made to attract the world attention and bring them to the United Arab Emirates. But behind the impressions, Burj Khalifa also has the interesting facts to know. These are the top 5 Burj Khalifa facts.

1. Burj Khalifa stills the Tallest Construction in the World

Burj Khalifa stands at 828 m tall with 163 floors. This is about 3 times of Eiffel Tower and twice of the Empire State Building. With this height, it makes this building a truly skyscraper. Even the top of the building is often covered with the clouds.

2. Burj Khalifa holds 18 Records

Burj Khalifa was built to be a sensational construction. In this case, it works pretty well. As the tallest building in the world, it seems easy for Burj Khalifa to get many records. At least, this building obtained 18 records from the world record association. The most records relate to the height of the building such as record of the tallest existing structure, the tallest structure ever built, highest vertical concrete pumping, world's highest observation deck and many more. With all of these records, it is easy for Burj Khalifa to be noticed and remembered.

3. Burj Khalifa has The Fastest Elevator in the World

With 163 floors, Burj Khalifa really has a big problem in accommodating people from the low ground to the top floor. This is why having a fast elevator is really crucial. To solve this problem, Burj Khalifa has a fast elevators, really fast actually. The elevators of Burj Khalifa can go 10 meter per second or about 40 miles per hour. Of course, it makes Burj Khalifa as a construction with the fastest elevator in the world. With this elevator, people can go to the 124th floor which is the observatory deck only in a minute.

4. Burj Khalifa takes \$1.5 billion of Development Cost

As the tallest building and one of the biggest artificial constructions in the world, the development of Burj Khalifa is so expensive. The development cost is about \$1.5 billion. The other **Burj Khalifa facts** is about the water supply. In a day, Burj Khalifa supplied 250,000 gallon of water. Of course this is really a big amount of water in a day.

5. It Takes One Month to Clean the Window

A high building means many windows to clean. For Burj Khalifa, this is really a serious job. There are about 24,348 windows on Burj Khalifa. You can try to imagine it. How to clean those windows? Amazingly, there is no special technology or technique to make it. The window cleaners use the conventional technique and equipment to clean all of the windows. Without any special technology or special technique, of course it will take a long time to finish this job. With 36 cleaners, cleaning Burj Khalifa's windows will take for about one month. It means you have to go back to the top and clean the top windows a day after finishing the last window. It makes this fact as one of the stunning **Burj Khalifa facts**.
